PROFESSIONAL SUMMARY

Android Developer with 2 years of professional software development experience, specializing in commercial Android POS systems and business applications using Java and Kotlin. Experienced in MVVM and Android Jetpack, REST API integrations, POS hardware and payment integrations, and database-driven applications. Strong background in troubleshooting production issues, optimizing performance, and collaborating with backend and QA teams across the software development lifecycle.

PROFESSIONAL EXPERIENCE

Android Developer | JIMAC Incorporated (POS Provider)

October 2024 – Present

- Developed, maintained, and enhanced commercial Android POS systems and business applications using Java and Kotlin.
- Built Android applications following MVVM architecture and Android Jetpack components, applying modular and maintainable development practices.
- Connected Android POS applications with backend and third-party systems using REST APIs, RabbitMQ, Retrofit, OkHttp, and JSON.
- Engineered Android POS-to-system API integrations, including hotel online booking and reservation management platforms.
- Integrated Android POS systems with SM Virtual Reality's online booking and reservation platform to support seamless booking and transaction processing.
- Implemented real-time API integrations that automatically transmitted live Android POS sales transaction data to mall management systems.
- Architected a POS installment and support management module to manage monthly payment plans, installment terms, and technical support coverage for POS deployments.
- Integrated Android POS applications with printers, barcode scanners, payment devices, and other POS hardware.
- Implemented local data persistence using Room Database and SQLite, including database operations, entity management, and data access through Android applications.
- Managed asynchronous operations and reactive data flows using Kotlin Coroutines and Flow.
- Worked with MySQL for remote data storage and backend-integrated data management.
- Developed and aligned Android POS software features to meet BIR accreditation requirements, tax calculations, government-mandated discounts, and official sales reports.
- Used Subversion (SVN) and Gitea for source code management, version control, collaboration, and maintaining application codebases.
- Troubleshot production issues, resolved bugs, optimized application performance, and improved code maintainability.
- Collaborated with backend developers and QA teams throughout the software development lifecycle.

Software Developer Intern | Open iT Philippines, Inc.

April 2024 – August 2024

- Developed a web application to automate internal hotfix processes and generate release notes.
- Worked with Python/Django, REST APIs, PostgreSQL, jQuery, Redmine, Git, and GitLab.

TECHNICAL SKILLS

Android: Java, Kotlin, Android SDK, Jetpack Compose, XML Layouts, MVVM, Coroutines & Flow, Room Database, ViewModel, WorkManager, LiveData, Retrofit, OkHttp, Android Studio, Gradle

API & Integration: REST APIs, Retrofit, RabbitMQ, OkHttp, JSON/Gson, Postman, third-party API integration, booking/reservation integration

POS & Payments: Android POS, POS SDKs, printer SDKs, barcode scanners, payment devices, payment gateway integration, QR/barcode scanning

Databases: SQLite, MySQL, PostgreSQL, Firebase, MongoDB

Backend / Web: Spring Boot, Django, React, Express, ASP.NET, jQuery, Bootstrap

Tools: Git, GitHub, GitLab, SVN, Firebase Crashlytics, Android Profiler, Android Studio Visual Studio

EDUCATION

Bachelor of Science in Information Technology

College of Sciences, Technology and Communications Inc. | Sariaya, Quezon Province | 2020 – 2024

CERTIFICATIONS

- Microsoft – Career Essentials in Software Development
- DICT – Basic Level of Software Engineering
- freeCodeCamp – Machine Learning with Python
- freeCodeCamp – Foundational C# with Microsoft
- freeCodeCamp – JavaScript Algorithms and Data Structures
